

DS UNIVERSE
TIER 1 • ENTRY CREW

FREE STARTER SET

THE FREE CREW

DS CREWMATE

Four hand-built chart tools that read structure, levels and trend **with** you — so a beginner's chart looks like a pro's from the first session.

● 100% Free — unlocked with a few ads

NO SUBSCRIPTION • NO CARD

Everyone deserves a clean chart.

DS Crewmate is the free entry tier of the DS Universe — the same design language and rendering engine as the paid suite, scaled down to the four things every trader needs on screen first: **structure**, a **trend line**, **support & resistance**, and a **checklist** to keep you honest. Built for NinjaTrader 8, tuned for intraday and swing, and engineered to stay light so the chart never lags.

FOUR TOOLS, ONE CREW

DS BC

MARKET STRUCTURE

BOS, CHoCH & equal-high / equal-low liquidity — color-coded the moment it prints.

DS CL

TRADE CHECKLIST

Your own entry rules, on the chart. Tick them off before every click.

DS TL

TREND LINE

One clean line that tracks the live trend and removes itself when it breaks.

DS SR

SUPPORT & RESISTANCE

Touch-ranked levels that self-clean once price closes through them.

Master these four and you've learned to read a chart. Everything else in the DS Universe is **built on this foundation** — which is exactly why we give it away.

● FREE, WITH ADS

No paywall and no card. Watch a few short ads to unlock the full Crewmate set, then it's yours to run. It's how we hand new traders a serious chart for nothing — and how Crewmate stays genuinely free.

DS BC

DS BC reads the chart's skeleton for you. It marks **BOS** when a trend pushes through its last swing and keeps going, **CHoCH** the moment momentum flips the other way, and the **EQH / EQL** liquidity pools price loves to hunt. Bullish events glow green, bearish events glow orange — so the story of the move is readable at a glance.

DS BC — LIVE BOS / CHoCH / EQ LABELLING

Trend, in plain sight

Know instantly whether a move is continuing (BOS) or turning (CHoCH) — no guesswork, no second-guessing your bias.

See the liquidity

Equal highs and lows mark where stops pile up. DS BC shows you the pools before price reaches for them.

Stays feather-light

Old structure is cleared automatically, so the engine stays fast and your chart stays uncluttered.

Structure is the chart's **plot**. DS BC narrates it as it happens — so you're reading the move, not chasing it.

HOW TO READ IT

BOS

trend continues through its last swing

CHoCH

momentum flips — the regime changes

EQH / EQL

equal highs & lows where liquidity rests

GREEN = BULLISH

ORANGE = BEARISH

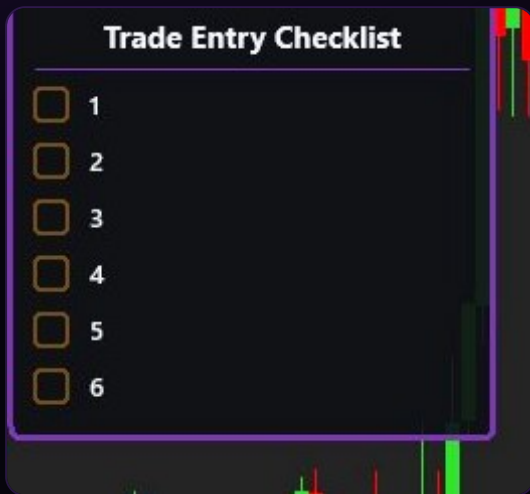

BOS · CHoCH

EQH · EQL

AUTO-CLEAN

DS CL

DS CL puts **your** trading plan on the chart. Write your own entry rules into a clean, DS-themed panel, then tick them off one by one before you ever click buy or sell. Click a row to toggle it; click the title to wipe the slate for the next setup. No engine, no signals — just the discipline you already know you need, right where your eyes already are.

DS CL — YOUR RULES, YOUR PANEL

Forces the process

Every setup gets checked against your own rules — the simplest edge most traders skip when they're rushing.

Entirely yours

Type whatever matters to you. Confluence, session, risk, mindset — your words, your checklist.

One-click reset

Tap the title and the panel clears, ready for the next trade. Fast enough to keep up with you intraday.

The best traders don't have more signals — they have **fewer skipped steps**. DS CL is the step you keep skipping.

HOW TO READ IT

Empty box

a rule you haven't confirmed yet

Ticked

a rule you've satisfied for this setup

Title click

clears every box for the next trade

TYPE YOUR OWN ITEMS

CLICK TO TICK

CLICK TITLE = RESET

LOCKED PURPLE PANEL

STANDALONE

DS TL

DS TL draws **one** clean trend line — the one that actually matters right now. In an uptrend it tracks ascending support in green; in a downtrend it tracks descending resistance in orange; sideways, it greys out. Each new swing refreshes it to the freshest pivots, and the instant price breaks or drifts away from it, the line **deletes itself**. You never stare at a stale line again.

- Always the right line**
 No drawing, no maintenance. DS TL re-anchors to the current trend so the line on screen is the live one.
- Never goes stale**
 Break it or abandon it and it's gone — not greyed, not frozen. The chart stays honest about the trend.
- Projects a runway**
 The line extends ahead of price, giving you a forward edge to plan entries, targets and invalidations against.

DS TL — A SINGLE, SELF-MANAGING TREND LINE

One line, always current. When it breaks, it's **gone** — because a trend line you have to second-guess isn't helping you.

HOW TO READ IT

Green line

ascending support — higher lows, uptrend

Orange line

descending resistance — lower highs, downtrend

Grey line

flat / sideways — no committed trend

DS SR

DS SR finds the levels that earn their keep. Confirmed swing pivots are clustered into touch-weighted zones and ranked by strength — **S x1, S x2...** for support, **R x1, R x2...** for resistance — so the more a level is respected, the louder it speaks. Support glows green, resistance orange, and when price decisively closes through a level, DS SR **erases it**. The chart cleans itself after every sweep.

- 
Strength you can read
 The x-count tells you how many times a level held. Trade the strong ones, ignore the noise.
- 
Self-cleaning rails
 Break a level and it disappears, so you're never anchored to a zone the market already gave up on.
- 
Clean projected zones
 Levels extend neatly to the right of price as runways — clear targets and decision points, no clutter.

DS SR — TOUCH-RANKED, SELF-CLEANING LEVELS

A level is only worth watching if the market keeps **honouring** it.
 DS SR ranks the ones that do and deletes the ones that don't.

HOW TO READ IT

Green zone

support — a floor price has respected

Orange zone

resistance — a ceiling price has respected

x-count

how many times the level held — its strength

S X1 · R X1 RANKING

GREEN SUPPORT

ORANGE RESISTANCE

BREAK = ERASE

PROJECTED RUNWAY

Free, with ads. That's the whole deal.

Crewmate is free because a few short ads cover it — not your wallet. There's no trial that expires, no tier that nags you, and nothing to cancel.

1

Install the set

Drop the four indicators into NinjaTrader 8 and load them on any chart, any timeframe.

2

Watch a few short ads

A quick, one-time unlock. No account juggling, no subscription, no payment details.

3

Keep the whole crew

The full Crewmate set stays unlocked and on your charts — yours to run every session.

WHAT YOU KEEP

All four tools, full rendering quality, on unlimited charts. The same engine that powers the paid DS suite.

WHEN YOU OUTGROW IT

The rest of DS Universe is waiting — Lv100 cockpits and DS Systems overlays. Crewmate is where the journey starts.

We'd rather earn a trader for life than charge one at the door. Run the crew free for as long as you like — **upgrade only when the chart starts feeling small.**

The promise: a clean, professional chart on day one — for free. Suit up with the crew, learn the read, and graduate when **you** decide.

Suit up. The crew's free.

Four tools. Zero cost. Watch a few ads and put a pro-grade chart in front of yourself today — then keep going when you're ready for more.
